Dear Mr. Hulse:

SUBJECT: 1983 SPECIAL CITY ALLOTMENT (SCA) PROGRAM

On November 16, 1982 we presented our SCA Program report to the Oregon Transportation Commission. In this report, we summarized the results of our investigations of projects requested by 85 cities.

Our on-site investigation of Elgin's proposed project on Detroit Street (N. 7th Ave.-N. 15th Ave.) and N. 7th Avenue (Detroit St. - Baltimore St.) are gravel streets serving residential neighborhoods; both streets need resurfacing; and, based on traffic counts furnished by Melvin Wood to the City, we categorized traffic as moderately-light (ADT 300). We recognize these streets need to be improved. However, by comparison, other projects showed a greater need for improvements at this time. The Commission, therefore, did not approve your request for a 1983 project.

You may reapply for a 1984 project shortly after the first of the year, when we send our application information for the 1984 program.

Very truly yours,

Kenneth Edusby
for D. E. Swan, P.E.
Program Control Engineer
